

Heritage Assessment- Bedrooms

The house has three bedrooms located in the first floor and are part of the original construction. They feature traditional style fitted wardrobe, fireplace and an alcove detail in one bedroom. The rear bedroom is currently used as a quiet room and has a small ironcast fireplace with two fitted wardrobe each side. All bedrooms feature a timber sash window.

Left front bedroom

Right front bedroom

Both front bedrooms to remain the same

Rear bedroom

Proposed:

Rear Bedroom: The current rear bedroom is small and it is not suitable for a small double due to the arrangement of fireplace and fitted wardrobe. Since it is currently used as the quiet room in the house, it would benefit from an extension so that it become a suitable space for a double bed. Therefore, we propose to extend the room to align with the kitchen extension, making the rear gable end of the house a two-story extension that matches the existing roof and the character of the house.
