COMMENTS:

The entire proposed site lies within the AWE exclusion zone, with all proposed roads leading in the direction of the AWE site towards the danger. There has been no proposal on how a care home with residents of limited movement will evacuate. Much needed medical facilities have been removed from the plan, which will cause a great strain on already existing facilities and result in longer waiting times. There is no provision for the increased capacity on the already busy roads, or the lack of improvement to a once-an-hour public transport system. There is also no provision for education facilities to prevent over-enrollment at existing schools
