COMMENTS:

I am a resident living nearby and I am unhappy to hear that an application to the remove the restriction on delivery times for the new development. I can hear and feel the HGV vehicles travelling long Viscount Way and I live at the end of Concorde Way. Traffic around this area has already been increased due to housing requirements in Woodley. One of my concerns, is that young children play in this area on bikes, and they do ride/run out onto Viscount Way without looking. There is no way an HGV driver will be able to stop should they be required! Another concern I have is about the environmental impact this will have on this area. If restrictions on delivery times are removed then pollution and noise levels WILL INCREASE. This will affect local residence health and wellbeing which will impact on our local health services. It would be a really good ideal if vehicles can be routed via Headley Road East for incoming traffic and Out via Viscount Way during the normal working DAY! This would mean that we would only get half the amount of traffic coming through which will dramatically reduce the impact on local residence and the environment.
