COMMENTS:

I am appalled by this application. Farley Hill is a small hamlet and its surrounding villages, which include Arborfield and Swallowfield, have recently experienced several major housing developments. 650 homes means probably 1300 cars and 2500 people.

Our GP surgery is already struggling to cope with the existing population, with GP appointments scheduled weeks in advance. This development, including a retirement home will only make this situation many times worse.

The road infrastructure, with narrow lanes, also struggles to cope with existing traffic levels. 1300 extra cars flooding on to the lanes, particularly during rush hour and school runs will only make this situation worse!

No thought appears to have been given as to how the above issues can be addressed.

There have been plenty of comments about the environmental issues raised by this application, and I endorse all that has been said. We cannot accept any more developments!!
