

Appendix 2 Illustrative Views

Introduction

1. A number of additional visualisations are provided within this appendix which supplement the assessment by providing an illustration of the effects mentioned at points within the text.
2. These visualisations have been prepared using TrueViewVisuals on an iPad and show solid structures of 3m x 3m x 51m to represent the masts overlaid onto a photograph (taken on site with the iPad), but not taking account of existing vegetation in the view. The receiver masts are shown in orange to make sure they are visible, but this would not be the final colour of the structures. They are matched using existing features within the views as 'markers' and provide a reasonably accurate representation of the likely scale and position of the Proposed Development within the view, but do not meet the standard visualisation guidance. The approximate width of the view shown in each image is 70 degrees.
3. Illustrative views A to D have been added to illustrate effects identified during the assessment process.
 - Illustrative view A – A4155 Shiplake (475903, 177909);
 - Illustrative view B – Binfield Road (483038, 170246);
 - Illustrative view C – Sadler's End (477924, 169382);
 - Illustrative view D – Forest Road (481041, 171020).
4. Illustrative view E shows similar masts. The masts shown are 30m masts with one rather than two antenna mounted, but have a similar tower structure and type and size of antenna.

Illustrative View A – A4155 Shiplake

Illustrative view B – Binfield Road

Illustrative view C – Sadler's End

Illustrative view D – Forest Road

Illustrative view E – Example view of similar masts
