

# PHOENIX PARK

## Viewpoint 5 Lines Road

**Existing View**  
This view looks across an arable field from a gap in the hedgerow along Lines Road. The skyline is very well wooded beyond the large-scale field. Individual properties and clusters of agricultural buildings are visible set within the edge of the wooded area. In the wider view, the tops of pylons can be seen above the wooded skyline. Elsewhere along the road, the hedgerow restricts views towards the Site.

**Predicted Changes to Views**  
The tops of the proposed masts would be visible above the treed skyline, with the majority of the masts screened by the intervening vegetation.
