

The diagram shows the geometric construction of the letter 'N'. A circle is centered on a vertical line. A triangle is constructed above the circle, with its base as a horizontal line passing through the circle's center. The letter 'N' is formed by the intersection of the triangle's sides and the circle. The top of the 'N' is the triangle's apex, and the bottom is the circle's base. The vertical stem of the 'N' is the vertical line passing through the circle's center.

This Drawing has been produced for printing onto A3 size paper,
