COMMENTS:

As the current Nursery Manager, I fully support this planning application for the replacement nursery building. The proposal represents a like-for-like redevelopment of the existing facility while providing a modern, safer, and more efficient environment for children, families, and staff.

The proposed new building would significantly improve the quality of indoor and outdoor learning spaces, accessibility, energy efficiency, and overall wellbeing for the children in our care.

Importantly, the increase in childcare spaces would help address the growing demand for high-quality early years provision within the local area. We regularly experience pressure on places and maintain waiting lists for families seeking childcare. Expanding capacity would allow more local children to benefit from early education opportunities at a crucial stage in their development, while also supporting working parents and the wider community.

I strongly believe this development would provide long-term educational and community benefits, and I respectfully encourage approval of the application.
