COMMENTS:

I fully support the planning application for the proposed Islamic community centre. This initiative promotes diversity and inclusion, ensuring that all communities have access to suitable spaces for worship and gathering. The Muslim community makes vital contributions to our borough's economy through business ownership, professional skills, and active participation across industries. Socially and culturally, they foster unity, charitable efforts, and civic involvement. Providing such a facility goes beyond religious needs it reinforces our shared values and helps build a stronger, more connected community for all.
