COMMENTS:

The proposed development is another material erosion of the semi-rural nature of the environment and associated nature habitat for all manner of endangered local wildlife.

The safety of local residents will undoubtedly be negatively impacted by yet further development and the associated traffic being released onto an already struggling, and in places literally crumbling infrastructure - doctors, hospitals, schools and local facilities cannot cope and will be further impacted.

The roads in this area are insufficient to support the amount of

extra traffic that this development will bring. This extra traffic will create more air pollution,
