COMMENTS:

Unacceptable over development, despite living here for 3 years. My family and I are still unable to access much needed local facilities. Cannot see how destruction of more green space can be warranted, this development is pretty much on my door step. Having purchased our home for the surrounding greenery I am beyond disappointed to see that this is potentially being destroyed. What will be done to manage the displaced wildlife? How will the extra traffic and subsequent pollution be managed? How will the flooding that is already an issue on Reading road be made better by this? What will be planned to combat both noise and light pollution? What will be done to manage the growing population? Facilities promised with the garrison development have still not be delivered upon. Ludicrous to think that a little bit of money in the right pockets absolutely ensures the ignorance of the council when it comes to doing the right thing for the existing residents!
