Many thanks for consulting us on this reserved matters application.

Archaeological investigations have been carried out within this parcel of the wider site, including both evaluation trial trenching and detailed excavation. A report from Wessex Archaeology has been previously submitted for the trial trenching, and an interim statement produced for the detailed excavation (the full report for this being expected under the condition on outline, once all works on the wider site are completed).

The heritage statement now submitted under 251263 satisfactorily outlines this situation ie that all required onsite mitigation for this parcel has been completed. Therefore we recommend that no further conditions are necessary for parcel 6

I trust this suits but if there are any queries about these recommendations then please do not hesitate to contact me direct
