COMMENTS:

I formally object to the proposed development. Our local infrastructure is already at breaking point, with schools (including the grammar school) and NHS services severely overloaded. Any further residential development must be preceded by a clear plan and commitment to expand these essential public services. Furthermore, I am deeply concerned about the potential increase in noise and pollution this project would generate, which will severely degrade the quality of life. We should prioritize the preservation of greenery and open sky over further unsustainable development.
