

PLANNING REF : 251471
PROPERTY ADDRESS : Prospect Villa
: Brook Street, Twyford
: RG10 9NX
SUBMITTED BY : Mrs H Morrison
DATE SUBMITTED : 17/08/2025

COMMENTS:

Permission to build this property was granted on the proviso that privacy glass was installed. I do not understand how this property was signed off by the council as being acceptable when the correct procedures have been blatantly ignored. All the relevant windows should be replaced immediately, in order that privacy is allowed to surrounding properties. The current residents of number 50 do not even appear to have installed any blinds or curtains, so anybody can see right through the entirety of the ground floor of their property as well as them being able to see into homes around them. For example, they can look straight into the kitchen of number 49, where the current residents had enjoyed privacy on that side for nearly 62 years. This privacy should be maintained.

Residents of Brook Street fought long and hard to prevent the building of this property and succeeded for a number of years. We then endured myriad problems as it was built, including residents being ticketed by the council for parking in the road they live in and being expected to find non existent parking spaces so that the builder could take priority. Frankly, finding that the builder then thought he could just ignore building regulations that were put in place to maintain privacy for current and long standing residents is just insulting.

Ensuring the adherence to the plans should be a priority and the privacy windows should be installed as per the original plans.
