COMMENTS:

As a teacher and resident within Wokingham borough: I object on the proposed development on the points below.
In the Wokingham borough; schools are struggling to fill spaces and numbers have dropped considerably meaning many schools (particularly primary) are unsubscribed and under funded. There is NO need to have another 2 primary schools when schools are unable to fill spaces and in fact taking having reduced class sizes across the area. There has been an overdevelopment in Wokingham borough for years now and we are losing vital green space and impacting biodiversity. We still have a huge issue with flooding in these areas too and recent developments like Hatch Farm have struggled to fill houses and keep people there due to flooding; transit links and so on.

Where are all these people to fill these homes and schools you intend to build? We have not got "bums on seats" in our schools to justify the millions this will cost! You will end up with empty homes and empty schools!
Strongly object!
