COMMENTS:

This is absolutely horrendous. Total destruction to the environment. We are supposed to be saving the environment not destroying it . Traffic in the area is already bumper to bumper causing pollution. Fact is and everyone knows this we don't have a housing problem we have a uncontrolled immigration problem which has totally got out of control and now we are destroying our country and wiping out our much needed wildlife. It's totally wrong . The only people who benefit from this is the developers. Britain is becoming a overcrowded concrete slab . Labour are fast destroying our country and us with its environment destruction. Labour should be taken to court for this mass slaughter.
