COMMENTS:

I strongly oppose these plans because football is the biggest grassroot sport and this ground is home to Shinfield Rangers who have looked after the pitches for many years. These plans will leave them without any pitches to play on. Sport is increasingly important for mental health and fitness and I cannot believe that research conducted on the use of this land would put the other needs proposed above

football. I do not see the demand for the facilities being built and I think it should be left as football pitches that are used by 100s of children and adults on a weekly basis.
