COMMENTS:

My property was purchased specifically to enjoy a village location and access to local doctors for medical reasons. 15 years later I have lived with continual construction noises, road closures and inability to drive to the doctors due to gridlock roads and blocked access road to the doctors. The existing infrastructure does not support the new houses already erected and how much more are local residents expected to endure. There are additional concerns about the increased risk of flooding. The local villages, particularly Shinfield, has suffered the very damaging and worrying trend of increased flood waters over recent years and additional construction will only increase the risk due to climate change and it would appear that Wokingham Council do not care in the slightest about the genuine concerns raised by the villages. There will be no villages left in the local area if this continues and it is about time that elected officials are called to answer for their actions.
