COMMENTS:

I strongly object to this proposal. Whilst I do not live in Chervil, I fish the local lakes and rivers including the ones this site is right next. There is a huge potential for a major environmental issue if there were to be a spillage that could get into the lakes or the loddon. If it got into the loddon then this could spread along the stretch wiping out all types of wildlife, fish, otters along the way.

When Speedy fuel have been using the site illegally without permission over the past few months there has already been a strong fuel smell going across the country park. The lake right next to the proposed site has just been given a grant by Wokingham Borough council and had natural seedbeds planted into it to increase the wildlife. this site would render that a huge waste of money.

Not only that the site is situated on a sharp almost blind bend. Even without planning having been given, this site has already been used illegally by Speedy fuels and there have been lorries coming and going. When one is leaving and one is coming, you have huge lorries sat parked in the road with the other lorry coming out and using both sides of the road. This is an accident waiting to happen as it is a fast and very busy road.

i strongly object as this is both an environmental disaster waiting to happen, but also a potentially fatal RTA in the making with the lorries entering and waiting on the old Bath Road.
