COMMENTS:

I wish to express my sincere objection to this planning application. I fish the lakes close by to the area and the risk of pollution to the nearby wildlife including the river will be catastrophic to the environment.

Before this application was put in place there was a significant smell of fuel and oil across the area. The planned waste into the Loddon is unacceptable and will be damaging to all nearby areas that the river flows into.

Furthermore, the nearby road is far too small to cater for large vehicles as the road is busy and will create a hazardous environment for large vehicles to turn into.

I strongly object to this application and any support of it is mindless and careless to the natural environment in the surrounding areas.
