COMMENTS:

We have concerns about this being built over the root system of 2 large oak trees. Any disturbance to these root systems could cause the trees to become unstable and impact our property (and our neighbours' property) if one was to fall. As the two trees at the back of the garden are 14.5m and 16m this would cause significant damage were they to become unstable. We also understand both of the trees have tree preservation orders and we feel any work to build foundations for a building could put the trees' health at risk.

If the proposed plans were moved away from the trees and further up their garden towards their house, out from the root protection area, we would not have an objection.
