COMMENTS:

I wish to object to the application on the following grounds:

Impact on local environment - the proposed site is sited adjacent to the Charvil Country Park and close to the Charvil Meadows and within the floodplain of the River Loddon. The risk to the environment caused by a potential fuel leak is unacceptable.

Road safety - the road is one of the busiest roads in the village, it is very narrow in parts with sections hindered by blind bends. There are no parking restrictions on the road outside the site, this area is already dangerous with waiting HGV's from neighbouring businesses. HGVs entering and exiting the proposed site will be potentially hazardous to other road users. As a result of the additional HGVs driving through the village, the zebra crossing on the road ought to be upgraded to a pelican crossing or similar making it safer for people to cross the already busy road. often with dense vegetation to the side and does not permit two people to pass easily. Increase in HGVs will discourage people to walk to Twyford and they will resort to driving which in turn will make the roads busier.
