About this product

We have 1x ex-demo Large Multi Chamber WoodStone® Bat Box available at a discounted price. It has some slight cosmetical wear on its front (See photo.), but otherwise it's perfectly fit for purpose. If you have any questions, please get in touch with us at customer.services@nhbs.com or call us on 01803 865913.

This multi chambered bat box has a large internal space that can accommodate a colony of bats. It can be used as a summer roost, or potential maternity roost.

The box features internal concrete dividers as well as a rough surface, this provides a wide variety of hanging spaces as well as making it easier for bats to grip. There are two entrances, one on the front panel and one on the underside of the box. The front panel and internal wooden dividers can be removed for easy cleaning in the winter months, provided the box is not occupied.

The exterior and front panel of the box is constructed using woodstone®. This material has excellent thermal properties that ensure the inside of the box will maintain a consistent temperature, is breathable which eliminates the issues with condensation, and has a long lifespan of up to 10 years.

The box can be mounted onto trees or on buildings and is best positioned at a height of between 3m and 6m. Bat boxes should ideally be sited in open sunny positions and in groups of 3 to 5 boxes facing different directions to provide a variety of micro-habitats. Please note that once bats have inhabited a roost site they may only be disturbed by licensed bat workers.

As a summer breeding box and for possible maternity groups, it is suitable for,Common Pipistrelle, Nathusius' Pipistrelle,Soprano Pipistrelle,Brown Long-eared Bat,Leisler's Bat,Natterer's Bat,Daubenton's Bat, Noctule

In mild winters, it may also be used by Common Pipistre and Brown Long-eared Bat.

WoodStone® fire-rated to DIN 4102-B2

Garantee under normal conditions: 10 years

Contents

- Large Multi Chamber WoodStone® Bat Box
- all plug
- Mounting screws

Specification

- **External dimensions:** 39 x 21.5 x 20 (H x W x D)
- **Materials:** Woodstone® and concrete
- **Weight:** 8kg

Review this product (/review/create?id=246918)

★★★★★ **Easy to fit**
By Firstname 22 Oct 2020

Easier to handle and fit than Schwegler boxes - can puit nail on tree then slip box over it unlike Schwegler where a 6" nail head will play havoc with your attempts to fit a box if you put the nail in the tree before mounting the box on it. Easy to inspect too, plenty baffles inside for roosting bats to shelter amongst. Quite heavy but guess well insulated.

★★★★★ **Solid**
By Lydia 23 Nov 2024

I do not know if the bats have used the box yet. On receiving my box I was pleased with the solid durable nature of the item. Hopefully it is a product that will last many years, as once installed high up on the gable end of the house it will be very hard to access again without scaffold.
