COMMENTS:

Although I appreciate there may seem to be a need for a mosque within the Wokingham /Winnersh area, this proposed site is not suitable for the sheer volume of traffic, people and parking it will attract. The access to this site from the Reading Road has been the site of numerous accidents in the past and will most definitely result in a build up of traffic back to the large "Showcase" roundabout, causing major disruption to the whole area. Parking at the site is limited, so where are all these people going to park? It has been seen in other areas that cars are parked on the side of the road and on verges which is not suitable for a main road such as the Reading Road. This will all cause a major disruption to the very local people to the site. I notice many comments supporting this are from further afield, so they do not have the knowledge or understanding of this road- the relief road was built for a reason, where as introducing lots more traffic to this part of the Reading Rd will just cause congestion.
