Dear Mrs Jackson

AMENDMENTS TO EXTERNAL AREAS
MICROSOFT CAMPUS, THAMES VALLEY PARK

Further to your recent correspondence dated 15th of February on the matter of the revised landscape plans, we have updated our layouts to include full height trees between every other band separating the parking rows. These plans have been reviewed extensively with the landscape architect and the engineers responsible for the CCTV cameras, and are being offered as the best solution to achieve full surveillance over the parking lot whilst maintaining the original landscape proposal for the car park. Although we have 13 less trees than the original planning application, we trust that you will agree this solution offers the right balance between maintaining a high level of security and the provision of more extensive tree planting.

We trust these layouts are in accordance with the spirit of the original landscape proposal and look forward to your response.
