COMMENTS:

Clearly not thought out properly for the interests of the community. Putting the environmental issues to one side and natural disaster risks such as flooding the site is not suitable for the size and volume of trucks. The small road connecting Charvil and Twyford is not wide enough. The blind spots when trucks pull out will be an unnecessary road safety risk for cars, push bikes and motorbikes. The extra congestion has not been thought out coupled with the expanding residential development which will mean heavier traffic, congestion, pollution and overall negative impact to the environment and road safety. Please can some empathy for the community and common sense be applied in this decision making.
