COMMENTS:

I object to the huge scale of the proposed building, which would be closer to the boundary wall of Remenham Row a private estate , than the current building (opposite number 1,2 3). The proposed building will dominate the homes at Remenham Row as it would be much

higher than the homes here. There will be a total lack of privacy, light and view for the residents here. The proposed building with the red brick and grey ceramic cladding is totally out of character with other buildings within the immediate vicinity and the Henley

area. The building will affect the lifestyle serenity of the retired people facing the building. Although some minor changes have been made to the design since our previous objection, it still does not address the objections fundamentally or bring this matter to a satisfactory resolution.
