COMMENTS:

Living near to this site I only learnt about this today and feel conned. It seems the applicant is being devious and cunning by not communicating or informing locals of this application - there's no signs in the site or public consultation. There are plenty of mosques and community centres for our brothers and sisters and as a member of the Islamic community I feel we are going about this in the wrong way. A place of worship in a business park is not right. I request our community leaders to think about the negative impact they are bringing to us.
