COMMENTS:

There is already a bin store that's a hazard to Pedestrian on the entrance to Ascott site. There are rats in the existing bin store. You're proposing another bin store against the garden walls and there has already been sightings of rats in the car park. Plus the fact of hygiene, smells, and looking out of the bedroom window at a bin store that does not belong to us it belongs to the site and another point is we will be deprived of sitting in our own garden. We are already over looked in our own garden and to build more flats it's double the intrusion, it's already uncomfortable and to pass these plans would be devastating to our life. The rd is only wide enough for one car, two cars cannot pass. The car park is not big enough all your doing is making it tighter and taking out the space for traffic movement.
