COMMENTS:

The traffic around that area is already ridiculous. The amount of traffic build up means constant delays around that area and now you want to add even more traffic to it. Totally unfeasible until you sort out the flow of traffic in that area. It is going to cause absolute mayhem. Not only that but you want to turn this into something that will disturb the nearby residents on a daily basis. Why should they have to have the noise of the deliveries and vehicles etc to contend with? There's been no thought in this whatsoever. Clearly the people proposing this do not live in the area or use the roads around it.
