

A 3D architectural rendering of a two-story house. The house features a grey tiled roof, a light-colored upper floor, and a red brick lower floor. The front facade has three windows on the upper floor and two large arched windows on the lower floor, flanking a central entrance door with a small white porch. A green hedge runs along the base of the house.

This architectural drawing shows the exterior of a house with a gabled roof. The front facade features a central double door with a transom window, flanked by a window with a decorative lintel. A chimney is visible on the right side of the house. The drawing is a simple line art illustration.

A diagram of a rectangular box. A horizontal line divides the box into two equal halves. Four forces are applied to the box: Force A is an upward arrow at the bottom center. Force B is a leftward arrow on the left side, aligned with the horizontal dividing line. Force C is a downward arrow at the top center. Force D is a rightward arrow on the right side, aligned with the horizontal dividing line.
