COMMENTS:

My mother-in-law lives at Thamesfield. I oppose the proposed development for the following reasons.

1. Block D will become disconnected from all other buildings. Unlike all other residents, residents in Block D will have to walk outside in order to access the main buildings and its facilities which is unacceptable for elderly residents, especially since they currently have indoor access to all buildings.
2. During construction, Block D residents will be living in a building site since parts of their block will be demolished. They will be subjected to high levels of noise and dust given that they will be staying in their own apartments during the building work. Furthermore, they will have to walk through a building site to access the main buildings which is a significant health and safety risk.
3. Those apartments in Block D with windows facing Block C will be overlooked and will be impacted by reduced light and view, especially since the proposed development is three storeys.
