

COUNCIL **TPO** APPLICATION DOCUMENT

TYPE OF APPLICATION: TPO

OUR WORKS REFERENCE: WFJMKW9M

ADDRESS/LOCATION OF WORKS: R/O 1 TO 2 BASINGSTOKE ROAD, SPENCERS WOOD, RG7 1AE

DESCRIPTION OF WORKS:

Our company (Traffic Control 123 Ltd) work on behalf of Openreach/KIER, clearing necessary cables and poles of trees and foliage. These works are necessary to allow access to facilitate the repair/maintenance/replacement of cables within the fibre network.

We have been instructed to clear cables running from a pole situated opposite 1-2 Basingstoke Road, to a second pole situated opposite Cranleigh, Basingstoke Road.

The cables run through trees on this road, and we need to make small cuts to a few branches to enable the cable route to be clear.

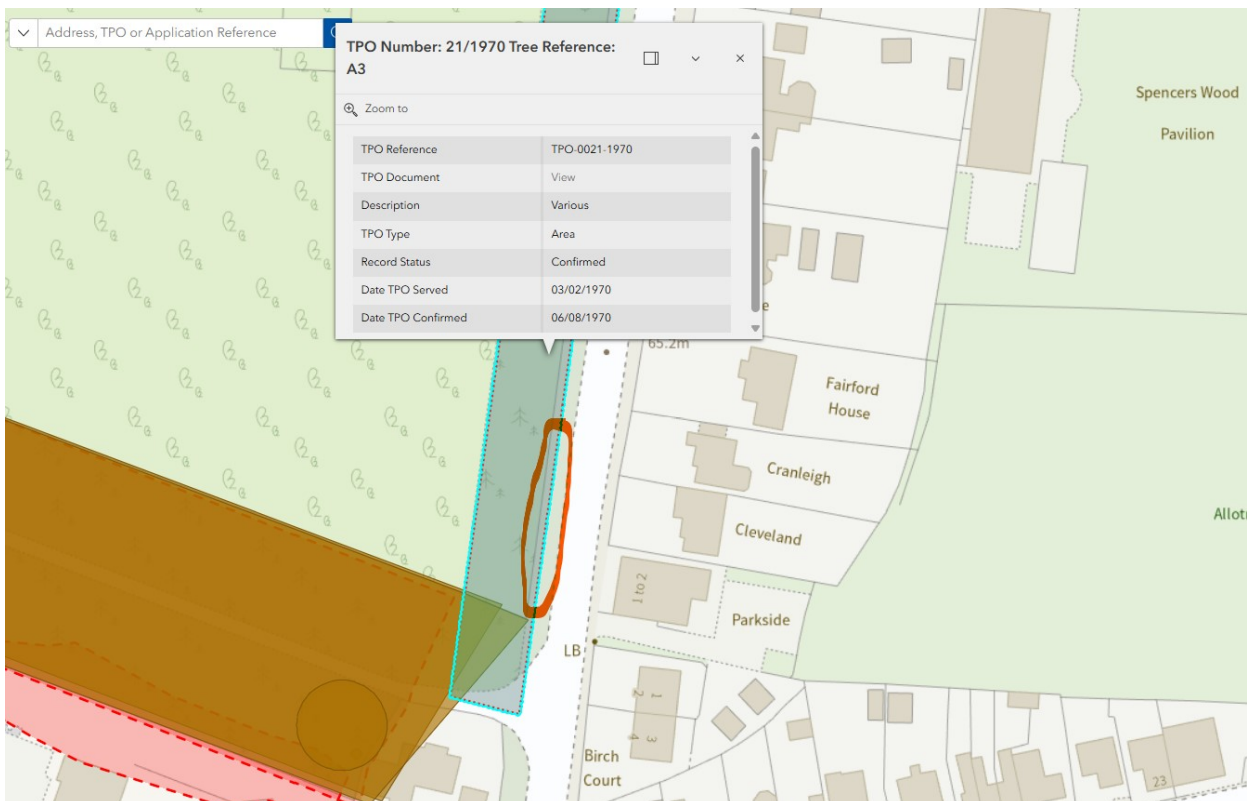

I have provided the following details along with site photos taken to highlight the works that are required.

I can see from the council map, that an area of the trees we are required to cut, are affected by TPO's. I am therefore applying for permission to cut a small portion of the branches on these trees.

TPO NUMBERS (IF KNOWN): TPO-0021-1970

Area circled in Orange is area in which we are required to cut trees affecting cables.

Species: OAK

See below orange circled area, showing where cable runs through tree line. Area within the circle will need to be cut, where cables are overgrown by branches/leaves.
