COMMENTS:

The traffic will become worse, impacting people like me who travel regularly using that area.

The place, building were helping promote business and helping generate employment, but this application takes away a building it's opportunity to generate employment and help the economy.

Understand the need for the community, but it can be planned somewhere it will not impact others, and they can fully utilise the existing community centres e.g Reading itself has more than 7 Muslim centres, which needs to be studied if they are fully utilised. Without that study, it doesn't make sense add more community centres. For the above reasons, I object to this application.
