COMMENTS:

Very disappointed to see this has been approved. as we have lived here for over 25 years with no intention of moving but if this extension is built it will have a very negative affect on our property. As mentioned previously, this extension will block the light into our conservatory, when the whole point of getting the conservatory was to let in more light. As far as we aware, no one has been to check the measurements, as the ones on the drawings submitted are not correct. We have previously had to keep the conservatory doors closed due to people smoking by the wall in the flats at the opposite side of our property. This has now been rectified but now we will have to keep them cloed to keeps out cooking smells as the keithen will be right up against our boundary.

It seems very unfair that someone can build an extension that has a major effect on someone else's proprty.
I do hope this will be looked into in more detail and the approval will be reconsidered.
