COMMENTS:

Dear Council team, our neighbourhood is really a quiet one with a very limited number of vehicle movements and after the neighbours moved in to the property 401 Old Whitley Wood Lane, there are a bit of traffic which is understandable as that is a community hall and they are really nice people, but the concerns I've raised several times to them was that the people renting/using the community hall are almost parking the cars everywhere on the road without considering the neighbourhood and it is a real hassle to take car out even from the house and get back in. When it is a community hall, this issue happens mostly in the weekend as whoever books the hall literally parks everywhere in an unorganized way. I should also say that this is a bit reduced in the recent time. If they are planning to setup a temple, obviously people movement will be more and this parking might become a common issue in this road. If this on road parking is managed in an organized way without disturbing the neighbourhood, that would be of a real help. I'm not writing this to object, as it is their property and doing something good for the community, but I would like the council know the challenges faced in the neighbourhood because of on road parking. Thank you.
