COMMENTS:

Here we are again, you know no matter how many times you push this it is wrong in so many ways. We know from the building of houses locally they are not for the locals and they don't meet the need for our community. They are for people that are making a fortune from selling their houses in Slough etc and moving here. We are overcrowded here now let alone the new houses proposed for lower Early etc. You don't live in this area and have no idea of the impact this will have on us. With other projects in Arborfield and Shinfield many things were promised and nothing has been done. All that happens is more pollution from cars and it will soon be total grade lock if you get your way. The local wild life will suffer and that of its local population. We do not need new homes we need to stop people having two homes and renting them out to any tom dick and harry. We have noticed a massive increase in crime and antisocial behaviour since you have build new home in our area. Developers and MP's alike don't care about us as we see on television, it's all about money and you will be found out. As to the farmer if this goes through with this, you should be ashamed and how you would look local people in the eye I don't know. This country needs more farmers farming so as to lower the cost of living, not selling off the land. As to our local councillors elections are coming and I see no one objecting and coming around to make sure this joke doesn't go through. SO FROM ME NO TO THIS DEVELOPMENT AS IT DOES'NT BENEFIT THE LOCAL COMMUNITY AND THE SURROUNDING AREA. It will cause more problems than answers.
