COMMENTS:

There simply isn't enough infrastructure to deal with this many new people. No doctors surgeries or health centres, a school yet we have a falling school roll.

No local shops, Wokingham Borough simply can't cope with what it has. Building a new village is simple madness. Green spaces provided so far lack biodiversity yet you want to remove more beautiful biodiverse natural fields? New estates plant trees that die and are unsuitable.

Concentrate on using brown space, demolishing unused office blocks, rather than taking fields.

And where you build have more thought about innovative design. Think bungalows not flats, or flats with decent balconies and outside space. Think communal areas that encourage socialisation. Not boring green areas with paths that lead nowhere
