COMMENTS:

While new homes are always needed for an ever growing population I have witnessed similar in Arborfield where this level of infrastructure was promised and took years to provide it, and construction has only just started 6 years on. With all these new bodies coming to the area other local doctor surgeries are becoming swamped with demand and in my own experience waiting times are now at 5 weeks to make a general appointment and this is in a neighboring village because Arborfield doesn't have their own surgery. This will only get worse if these proposed infrastructure offerings are not built in the first few developments of these sites.
