COMMENTS:

I currently fish at the country park and strongly object to the planning permission.

Risk of pollution is ofcourse the main reason and the possible effects it would have on the country park and surrounding areas would be catastrophic. Here are my reasons.

Planned Piping of outflow of waste water into Loddon and what that would contain. Riverways are already on the decline due to the negligence of water companies and this would certainly add to the issue.

Also the increased traffic movement along the old bath road with increased tankers along a narrow road.

The operation for 7 day a week starting at 6am

Noise, light and air quality pollution.

The Smell of fuel was evident in the country park when they were operating without permission.

They are planning on having countless 8m tall lighting poles with floodlights which doubtless will be on 24/7.

The country park and surrounding area would be irreversibly changed for the worse.

Regards

James
