COMMENTS:

I support this planning application for the proposed natural burial ground.

This is a thoughtful and environmentally responsible use of land that will provide a peaceful space for the community while enhancing local biodiversity through tree planting, wildflower meadows, and habitat creation. The low-impact nature of the development, together with its sensitive design, ensures it will sit well within the rural setting and have minimal impact on the surrounding area. The proposal offers clear environmental and social benefits, and I believe it is a positive addition to the local area.
