COMMENTS:
Ruscombe Parish Council support this application but we would have liked to have seen a greater mix in the type of apartments within it, with less 1 bed/single occupancy units and more 1 double bed units and 2 bedroom units to accommodate couples and young families. We would have liked to have seen some consideration into the integration into the community for the residents of these new units, with possible
access across the railway to access the station quickly or the Colleton School. RPC also note thatthis application will inevitably open to lakes up to the residential public and therefore RPC would like to see how public safety is being accounted for.
