PS5	217	60.926	61.700	1200mm	2.75 x 2.75	2.00	1.20 approx.
PS6	216	60.779	61.600	1200mm	3.00 x 3.00	2.00	1.20 approx.

Notes

1. This drawing is to be read in conjunction with the Drainage Construction Details (431000/C1809/13/2-4) & the Section 38/104 Plan.
2. All private drainage works to be carried out in accordance with the provisions laid down in BS EN 752 & The Building Regulations, Part H.
3. Levels shown in buildings are DPC /SSL levels.
4. Before commencing any Sewer or drainage works, the Developer's Groundworker must satisfy themselves, CALA and Thames Water Utilities of actual levels and conditions of existing sewers.
5. Drainage under roads to be either:-
   a) Vitrified Clayware to BSEN295.
   b) Concrete to BS 5911, Class M.
   Laterals to be formed of either vitrified clay or "Extra Strength", concrete "Class M",
6. Buried concrete to be Class 1 conditions in accordance with BRE Digest 363. Unreinforced concrete may be non-sulphate resisting Portland Cement; a minimum cement content of 320kg/m3 & maximum free water/cement ratio of 0.50.
7. All abandoned, buried obstructions encountered during the construction of Highway & Drainage Works are to be broken out to bed level of drains and sewers, and to the formation of carparks and drives etc., and to sufficient depth to allow for laying service company's mains and services.
8. **Important Note**
   Prior to commencement of any of the onsite drainage works, the groundworker must install the downstream connection to the existing Public FW Sewer in Sandhurst Road. Any conflicts with existing below ground services to be reported to CALA immediately.
9. Insitu concrete to benchings of foul manholes to be Class 4 conditions; ie min. cement content of 360kg/m3 Sulphate Resisting Portland Cement, and max. free water ratio of 0.45 and 20mm n.a aggregate.
10. Precast concrete used in construction of the foul sewers to be Sulphate Resisting to Class 4 conditions.
11. Depth and Location of existing services to be traced prior to any excavation within existing highway.
12. All private drainage to be laid to levels shown using flexibly jointed pipes, either uPVC to BS 4660 and BS 5481 or vitrified clayware to BS EN 295.
13. Private manholes to be constructed using conc. box sections, circular rings to BS 5911, or Polypropylene Inspection chambers where less than 1.0m deep, all with 100mm concrete surround, size and construction to comply with the construction details and requirements of BSEN 752. Covers to be cast iron, light duty in rear gardens and communial open spaces, and medium duty in private parking areas / drives.
14. Rodding eyes, etc are to be laid to manufacturers minimum cover and depth to allow adequate fall from adjoining unit.
15. Access panels are to be provided to all rainwater pipes, a max. 600 above finished ground level.
16. Care must be taken to ensure private manholes, rodding eyes, etc. are NOT positioned within curtilage of Adoptable Estate Rd, Footway or verge.
17. Flat lateral connection to be 135° 'Y' junctions (ie 45° oblique junctions) to point of main run.
18. Manholes in block paved areas to have recessed cover & frame. These to be orientated to minimise cut blocks.
19. For highway soakaway details refer to 431000/C1809/15/3. For private soakaway details refer to 431000/C1809/13/5.

Legend
