COMMENTS:

I'm very concerned about the high risk of contamination to the adjacent country park, river and ground water especially when the area floods. I have concerns regarding road safety. Currently large articulated lorries park on the Old Bath Road whilst they wait for their appointment at the tyre company. I have personally gone into the company to ask them to move the vehicles when they have blocked the pavement and parked on the bend . Adding tankers to the mix will only exacerbate the existing problems.
