COMMENTS:

Thank you for letting us know about the planning application for No 8 Keane Close. Your plan elevation indicates our property as No 62 when in fact this is No 63. Can you please provide more information regarding the boundary line and any construction along it with respect to foundations and access please? The plan elevation seems to show a greater angle to the boundary line compared the line currently therefore it is much closer to the new extension than shown. The boundary line is separated by a wooden fence (No8 side) and a row of leylandii trees (No 63 side) directly next to the boundary line with a 1m deep garden and 2m deep gravel area. We would respectfully request that the physical boundary line be checked on-site against the proposed extension to confirm what effect this will have on our garden and treeline please. We would be pleased to provide access as required to assist. Best regards, Paul & Sue Steele.
