COMMENTS:

I strongly object to this application as a resident of this lovely town for over 50 years - this will forch more traffic into local housing estates which were not designed for the extra flow and cars - this will have a bad effect on road safety and congestion. 2650 houses in wokingham in total with this new proposal will create thousands of new cars onto an infratructure that will not be able to handle it - destroying open countryside and going against every sustainable and green guideline that should be supported by our council - Ludgrove has already been decimated and the new road and houses planned will have a very disruptive effect on the town - it will add to pressure on local secondary schools - traffic and health services - how can the town medical centre and royal berks a and e cope with another 1600+ people in addition to the planned development already being built? This will impact the current residents and it must not happen. The wokingham rd/easthampstead rd junction will be even more dangerous and there is also big developmants in Bracknell and outlying areas that will add to the disruption - this will put a huge pressure on the already creaking infrastructure - traffic will be a nightmare and green spaces will be ruined - I believe this will mean a planned 3600 houses will be added to our once cute market town - that a minimum of 7000 people with know new surgeries or secondary school places - please please do not agree to this - if you want to be sustainable, sensible, be the voice of all of us living here and vote against this NOW - IT WILL MAKE OUR TOWN SOMEWHERE WHERE NO ONE WILL COME TO OR WANT TO LIVE IN
