COMMENTS:

Please stop!!

I would rather die than see more house go up on even yet more green space.

I have already moved out of Wokingham because there are too many new housing estates popping up and the congestion every day is getting worse and worse.

You keep telling us to recycle, and slow down to reduce emissions because of the apparently terrible air quality, yet you now want to allow that to get worse by introducing more housing/ people/ cars/ commuters to the area?

Our water treatment plants are already struggling to cope and frequently discharge raw sewage in to the river network. This is going to get even worse!!

Your roads can't even handle the traffic that has been travelling over them for the last several years causing very dangerous road conditions which you didn't seem to care about.

Are we living in the dark ages!?
