COMMENTS:

I feel that this is too large of an extension to a house already extended previously. It is out of keeping with the surrounding houses and will be very imposing to all the houses whose gardens all back onto each other. The last extension went on for ages with loud music and no privacy in my own garden throughout.

The side extension 1st floor window looks directly over my patio, I see this is an ensuite window so will have privacy glass, but regularly see plans change. I feel the side extension as a possibility as long as that window remains a bathroom window but the 1st floor back is too much.

Also what additional parking on the property is being provided as Brompton Close is already at full capacity due to other extensions and what was originally a turning point is now full with cars often making access to the alleyway onto Kilnsea difficult. There is a constant overflow of inconsiderate parking into Easby Way and outside of my house which is disturbing due to the closeness of my front room to the road. These roads just do not have the capacity for parking for the increased number of large extensions being approved and the additional traffic it causes. Pavement parking is a norm and I often find myself walking down the middle of what is now a very busy road. I hope the council can consider these comments, thank you.
