COMMENTS:

I object because I do not believe the infrastructure can support an additional 850 homes. Specifically, South East Water, but also other local services.

South East Water recently sent out an email to all its customers asking us to reduce our water consumption due to the fact the area is already under high stress. I regularly have no water for hours or days at a time.

This application seems to assume South East Water can support or will be able to support these additional homes, which means permission can be granted without proof that the water supply and sewage treatment can cope with the additional pressure. We cannot assume this will be ok, especially considering the current demand is not being met sufficiently.

The assessment of requirements to infrastructure, such as water supply, to support this development needs to be done in advance of the application being approved.

I would also like to see a detailed impact assessment on local wildlife, considering how much habitat has already been lost in the area. Again, before any planning application is approved.
