COMMENTS:

Housing targets already met. No need to develop this land too.
Poorly thought through infrastructure. More houses will put even
more strain on our woeful road systems and healthcare provision.
More houses = more cars on the road. The total number of houses
built without Wokingham / Wokingham without in the past 10 years
and the planned houses around the SWDR is putting immense strain on
all infrastructure and the constant road closures to cope with the
new houses proves how badly planned this has all been. Roads are
constantly closed to update water / sewage / broadband etc.
